

Gabrielle Accatino  
720 36th Street  
Boulder, CO 80303

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. See Also Comcast spokeswoman Jennifer Khoury said that the company paid some people to arrive early and hold places in the

queue for local Comcast employees who wanted to attend the hearing. Some of those placeholders, however, did more than wait in line: They filled many of the seats at the meeting, according to eyewitnesses. As a result, scores of Comcast critics and other members of the public were denied entry because the room filled up well before the beginning of the hearing. <http://www.portfolio.com/news-markets/top-5/2008/02/26/Comcast-FCC-Hearing-Strategy>

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Fort Collins, CO 80526

When Comcast, or any other provider determines the performance of the Internet, and blocks their users' ability to freely communicate as they choose, they are overstepping the bounds of public interest. A telephone company that chose which people you were allowed to call, which calls they would bug, and which calls they would block would very quickly be put out of business by the FCC. Comcast is engaged in these very practices in regard to their Internet subscribers, while deceptively advertising that they provide full Internet access for roughly the same fees that actual Internet providers charge. Comcast should be compelled to advertise that they provide "limited, filtered, and supervised" access to the Internet for those who are willing to pay a premium price for a limited service. It is critical that the FCC use their regulatory power to maintain Net Neutrality and prevent monopolists from determining how and in what way the Internet is used. Comcast is a public utility and should be required to act in the public interest. If they continue to disregard this imperative the FCC should ban them from the marketplace. Do the right thing. Tell Comcast to provide the service they are chartered to provide and to stop monitoring the public's Internet use, throttling

bandwidth, and engaging in other such practices that limit the scope of Internet access. We would not tolerate this behavior in a telephone provider, and we should not tolerate it in an Internet service provider.

While the sharing of certain kinds of files is in violate of copyright law, other sharing certainly is not, and it certainly isn't the role of an isp to police this area. Instead, Comcast's blocking of peer-to-peer communications seems more like a stepping stone to more general violates of net neutrality in the company's financial interest. This would be a major blow to the democracy of information which is vital to the dissemination of good information. Please take action against Comcast for this. Thank you. David Ciepley

169 So. Washington Ave.  
Louisville, CO 80027

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

DENVER, CO 80230

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. As a Comcast customer I am particularly concerned that Comcast achieves this blocking through a deception that makes it appear to each end that the computer at the other end has denied the connection. They appear to have assumed that subterfuge and dishonesty with their own customers is the way to go. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. In pursuit of ever higher returns on their investment, and higher profits, the broadband providers in the US have been quite successful. But meanwhile, broadband availability and speed in our country continue to fall behind other countries in Europe and Asia. The Internet is a vital engine for economic growth, civic participation and free

speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Conrad de Kerckhove  
NotInTheUS  
Devner, CO 80246

The Internet is a great resource, a world-wide resource, and a resource that many people are working hard to ensure that as many people as possible get access to. It should therefore not be possible for companies such as Comcast to limit what they supply - access to the Web, no matter the protocol, client or content, assuming that this is not illegal. The Chinese government's request to Google to filter search results caught many people's attention. By conceding to this, Google submits, as is appropriate, to the authority of the nation which is concerned. However, this censoring of information is a disgrace in a nation whose people supposedly pride themselves with their freedom. Though I am not a resident of the US, I feel that this is not merely an issue inside a single nation. The Internet is a world-wide concern, and should be treated as such. When the US, which has historically been a leader in computing technology, stoops to these levels, it is worrying to consider what may become acceptable in the coming decades if selective denial of access such as Comcast's recent actions, were to become common-place.

Robin DeGrassi  
912 E 10th Ave  
Denver, CO 80218

Please keep the internet free - don't let Comcast dictate how this important technology is used! Imagine if the cellular phone companies wanted to place restrictions on who you could call with your own phone - this is just as ridiculous! Please stop this.

A free internet is just as important as a free press, and I argue is constitutionally protected as such. We the People paid for the internet and it must be accessible to each and every one of us in a free society. Allowing "free enterprise" to restrict access in any way is a violation of this constitutional right, and is wide open to corruption. Do not allow Comcast to set a precedent here.

Christopher Eliot  
9215 E Nassau Ave  
Denver, CO 80237

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. Several news organizations have reported that they detected Comcast sending false packets that signal to each party in a communication that the other party wishes to disconnect. Comcast hides behind a "managing traffic" statement when asked about this. It strikes me that when Comcast arranges to benefit from such false packets, this is FRAUD. They are communicating false information for their own benefit.

Michelle Eytcheson

3700 Quebec St

Denver, CO 80207

I don't regularly use peer-to-peer communications, but Comcast's blocking of same is exactly the problem I feared would occur without Net Neutrality protections. The Internet is a vital engine for economic growth and, as a business owner myself, it is imperative that such a resource remain neutral, free, and fast. In the interest of the market, we need to keep Comcast and other companies from discriminating against new technologies, secretly interfering with Internet traffic, and stifling innovation. Therefore, the FCC must take serious and immediate action to put an end to this practice. We cannot allow other Internet service providers to follow Comcast's example and make themselves the gatekeepers of the Internet. Our economy depends on it. Thank you for your time.

Walsenburg, CO 81089

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Commerce City, CO 80022

Dear FCC constituents, it is of grave concern that the internet remain as net neutral and free from the kinds of control that companies like Comcast and the like utilize to take advantage of unsuspecting everyday internet users like myself and others. Thank you for looking into this matter and the fairness of equal access to all who use the internet, regardless of you are or your station in life. Please ensure that those that have the money and power to purchase these large pipelines (and in truth, the information highways) understand that these roadways, in many respects, are no different than our city, state, federal, municipal, county, rural, etc... streets, roads, highways, interstates and freeways and such... and should be treated in like manner allowing all who travel these roads (thus information highways) equal and unbiased access without restrictions as they pertain to the nature of these comments. Thank you!!

Art Flores

We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. I spend a lot of money each month to Comcast, I like everything they offer. The only problem I had is when I tried (more than once) to email my Congressman and or my Senators regarding this corrupt administration which always includes the president and vice president, I receive system error messages. When I don't include the presidents and vice presidents name, it goes through. This has got to stop, the Internet needs to be free. Thank you

Mike Flynn  
1736-C Springmeadows Court  
Fort Collins, CO 80525

Net-Neutrality HAS to be maintained otherwise this sort of thing will start popping up in other ISPs. The ISPs need to be restored to a Common-Carrier status. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service

providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Jacob Fogg

To whom it may concern, Please don't let COMCAST waqlk away with a slap on the wrist. huge corporations like this need to feel the sting when handed a judgment by the FCC. Comcast's blatant disregard for net neutrality laws demonstrates their bravado. The sanctions imposed against them need to make their stockholders sit up and take notice. The sanctions need to make other conglomerates sit up and take notice as well, or they will begin to see fines by and sanctions imposed by the FCC nas just another operating expense. Scott Griffiths

Carbondale, CO 81623

I am a Comcast customer and I have experienced Comcast's violations of Net Neutrality firsthand. It is directly harming my business and my ability to compete. I create television programming for major US corporations and use ftp sites for client approval screenings and for final product delivery. My connection performs well for "normal" Web and email traffic. But when I attempt to transfer files via ftp, the connection slows to a crawl... nowhere near their advertised speeds. To add insult to injury, I even pay extra to Comcast to get their fastest service. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. Thank you.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Ann Johnson  
5 Bannock St.  
Denver, CO 80223

It is deeply disturbing to me as a citizen to have to fight tooth and nail for the rights endowed upon me by the Constitution. It is the American people who own the airwaves as a collective. It is not up to big business to cordon and control the interplay of communication for the sake of profit. Freedom of Speech and Freedom of the Press...why must there always be an issue of debate regarding the sale of information? The debate has to occur. Privacy is each man's right in a democracy and is protected by the Bill of Rights. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. We must preserve Net Neutrality protections. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Boulder, CO 80302

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an

abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. Open and free international communication essential for the development of a democratic community of nations engaging in free trade.

Is it okay for a company to check to see who is calling you and then determine that the call is coming from someone the company doesn't want you to talk to, then blocking that phone call? There is no difference here about a phone call or a data-stream coming in on a computer. Get Comcast's fingers off of our data! Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. I don't see how you can even consider a ruling in favor of Comcast and the telecom lobby to be a fair ruling, given the obstructionist tactics of Comcast that were recently documented in Boston! As you represent a government of/by and for the people (not of/by and for the Corporations) you have no ethical choice but to rule against the telecom giants. Please do so forthwith and in good order. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. I have begun to notice these interferences, and they are very obstructive. To the point that I can't send an e-mail from certain accounts at some wireless hot spots, but can at others. From my research, this is from certain ports being blocked. This interferes with my ability to work from outside of my house, and should be viewed as such. These people need to provide pipes for information, not opinions on what can be sent from where. The internet is the last form of communication for democracy, once that is owned by corporations, our country is a corporate dictatorship (albeit with many dictators, unless you count George Bush, but he is hopefully leaving).

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. I have Comcast as an Internet provider and I for one do not like the Idea that they can block anything on the Internet. As a provider I think they do not have the right to block anything, that should not be left up to them. So I hope that you would take the correct action and not let this happen with anyone. Thanks David Land

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. I agree with the above statement and here is my own. I have found through my own experience as a Comcast user that certain sites

and content load quicker than others. I have performed various tests, used different service providers and computers and have found that on all computers on a Comcast connection that some sites load slower than others. On other providers, they all load at the same speed.

Boulder, CO 80302

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. In addition to all of this, any allowance of Comcast to block transfers that they decide are too draining on the network will give precedent of a childish game of throttling down any high speed activity on the net, just because of their refusal to continually rework their network to fit modern standard. It's as if the state decided that they didn't want to build paved roads instead of their dirt ones because they thought the cars would just drive too fast. Instead they decided to just ban cars altogether. Let's try to encourage a move into better technology instead of allowing dirt roads to become our standard.

Richard McGowen

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. A free flow of information is the very life line of democracy. Controlling the internet in the way Comcast has tried to is the same as taking away a citizen's freedom of press. This is how communist nations control their people and we need to be ever vigilant of this happening in our country.

The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. The profuse amounts of accusations against Comcast make me now wonder why I have Comcast High Speed Internet. I switched to Google's Gmail because they were hostile to my request to them, (this, over the phone), to improve their email presentation: "No! You cannot talk to a supervisor to complain!" What is their problem with life? Does somebody odd own them, like, say, someone who doesn't like America? I wouldn't say they're owned by Islamic Terrorists/sympathizers, but I do say they like to bludgeon America into a vegetative state, something that makes patriotism difficult, so that we might make a mistake and be defeated by them. Doing the work of terrorists is indistinguishable in effect from being such, in any case, and there's nothing funny about that, now, is there?

The internet is the best thing since cheese or beer, and is commonly used for many academic pursuits by myself and colleagues. These Academic endeavors, such as My wiki, geology.wikia.com would not be able to pay the access fees that companies like Comcast are trying to push on us, and thus without net neutrality only commercialism would succeed. Don't let this happen! The internet is not just a medium for big corporations - it is heavily intertwined with the identities and futures of human s all over the world. Don't let this happen! Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. They can find better (not to mention legal) ways to manage traffic flow on the networks.

Douglas Shortreed  
2127 S Douglas Ave  
loveland, CO 80537

I used to use peer to peer tech for sharing video and photos with family and friends.. It was an easy way to let my loved ones get what they wanted (even the less tech savy ones)freely. Since Comcast has blocked this, we haven't been able to do this. I will be buying web space soon to host my files (personal photos and videos), but unfortunately can't afford it right now. I agree with the following statement: Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. The increasing consolidation of traditional media is an even stronger argument to keep the Internet as free and open and accessible to all as much as possible. The MSM gives us less and less detailed information and companies have their own agendas which don't necessarily match with the truth, let alone the whole story. Witness the so-called "race war" within the Democratic Party that was more media creation than substance, or the Hormuz Gulf story, from the point of view of the Navy Times as opposed to, say, Fox. How many people get the Navy Times and look how long for doubts about the original story began to surface in the MSM! WWII except for the Navy Times? now there's a thought...

Cynthia Timko  
4519 N. 26th St.  
Boulder, CO 80301

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. If this accusation has any basis in truth at ComCast needs to be fully investigated and properly punished for such a blatant act undermining basic democracy. This sound like something some small potatoes dictator would pull in an election, or even big time potatoes type: vote early and often, and keep the real voters out. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Denver, CO 80220

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. And it must be understood that policies like the one Comcast implemented are HIGHLY dangerous to its continued functioning, future development, and accessibility to all citizens. Comcast justifies intrusive and discriminatory policies as "necessary" to make the system fair, but there are much simpler ways of accomplishing that--implementing a tiered pricing structure, for instance. Their "fairness" argument is a canard--they have set themselves up as a quid-pro-quo enforcement agent for the MPAA and RIAA, but in a way that will have disastrous long-term effects on the Internet as a ubiquitous and general system-of-systems. I urge the FCC to look long and hard at Comcast's practices and realize how short-sighted they are. Please safeguard the Internet's current and future utility to all of us by soundly rejecting these extremely unwise practices. Best Regards, - RBW

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. Elitism is pulling the USA down. The current "free market" ideology increasingly sets the market loose to be controlled by big money interests. Increasingly this big money controls the government too. There must be some common ground, some community, some aspects of our society that glue it together, or society comes apart. We can't be a cohesive nation where it is every man for his free market self, and fuck everyone else to get it. That is why the USA is currently in decline. There are many things the USA just can't do because we have no national community left. There must be some public domains. Infrastructure, physical and others, including the airwaves, and communications, such as the internet. With 5 dominant mega conglomerate corporations controlling what the American public knows and telling them what to think about that limited knowledge, the only possible alternative is either the internet or shortwave radio. Allowing big corporate control of the internet is wrong, it is anti democratic, it is anti First Amendment. The airwaves and the internet are public domain and not some private reserve to enrich some mega-corporation. We need government of, by and for

the people, not of by and for large concentrations of wealthy interests to get control of even more money. With all due grave concern, Greg Walljasper

Englewood, CO 80110

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. If I had a choice here in Denver, I would not use Comcast, however I don't see that any of these companies are any better than the rest, therefore I must be a voice in the crowd and demand that this company provide the services I pay for.

Lakewood, CO 80214

Sometimes a federal regulatory body needs to make an example of a violator, to send a message to members of an industry testing the envelope. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. And it is exactly the kind of infraction deserving of a sharp punitive response from the FCC. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. Comcast has no right, proprietary or inherent, to monitor or impede the traffic it shuttles to their destinations. It is a mere carrier and should be reminded of that fact.

Modern up-to-date legislation does not yet affirm what we collectively know : the internet has become a common-carrier type of service. However, we all know this now, and expect that, just as our telephone conversation may go unhindered, our internet traffic will go unhindered. Filtering content on any network without consent or disclosure is a egregious violation of trust. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. To do so in the face of our alleged 'democratic' principles is to erosively undermine our freedom we so dearly cherish here in the U.S.
